SUMMARY

Frontend-focused Full-Stack Engineer with nearly 2 years building production web products with React.js, Next.js and TypeScript. Turned a client-approved design system into a reusable component architecture for NayaaProperty, improved page load time by about 30%, and built REST API integrations backed by MySQL. Also built frontend screens and the AI chatbot interface for Naida AI, a legal research web app, and builds NayaaProperty and an AI voice assistant using Claude AI-assisted development.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **State Management & Validation:** Redux, Zustand, Context API, Zod
- **Design & UI Architecture:** Design systems, reusable component architecture, Figma-to-code, responsive web design
- **Backend & APIs:** REST API development, API integration, Python (working knowledge)
- **Databases:** SQL, MySQL, MySQL Workbench
- **Cloud & DevOps:** AWS S3, Docker (basic), Git, GitHub
- **AI-Assisted Development:** Claude AI for UI generation, API development, debugging and refactoring; AI chatbot interfaces
- **Mobile & Desktop:** React Native, Expo, Electron.js
- **Tools:** Postman, Jira, VS Code, Figma, Google Blockly
- **Practices:** Agile/Scrum, branch-based Git workflow, code reviews, client collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer (Full-Stack Product Development) | Conzept Sparx, Mumbai, India | Jan 2025 – Present

Product: NayaaProperty, a real estate platform with a CRM, a customer-facing site and a developer portal

- Develop frontend and backend functionality for NayaaProperty across the CRM, the customer-facing interface and the Developer Property Listing Panel, using React.js, TypeScript and Tailwind CSS.
- Improved page load time by about 30% by optimizing component rendering and state management.
- Collaborated with the client to create the NayaaProperty design system to their requirements, then implemented it as reusable, responsive React components used across product screens.
- Implemented client-approved redesigns of the Developer Portal, including the multi-step Add Project workflow with form validation.
- Built and integrated REST APIs connecting frontend workflows to a SQL/MySQL database, testing endpoints in Postman and validating data in MySQL Workbench.
- Built dashboards, property listings, search filters and dynamic forms for property management and lead tracking.
- Deployed application builds to AWS S3 and debugged frontend and backend integration issues.
- Used Claude AI-assisted workflows to generate and iterate design-system screens, develop and integrate APIs, and refactor code.
- Worked in a branch-based Git/GitHub workflow with Jira-tracked tasks, coordinating directly with the client on requirements and feedback.

SELECTED PROJECTS

NayaaProperty Design System | Figma, Claude AI, React.js, Tailwind CSS

- Co-created a product design system with the client, iterating screens through Claude-assisted design workflows and translating the approved patterns into reusable frontend components for consistent implementation across the CRM, customer site and developer portal.

Naida AI – AI Legal Research Web App (Team Project) | Frontend, AI Chatbot, REST API Integration

- Built frontend screens and the AI chatbot interface for a web app that helps law firms and advocates study past cases, research laws and prepare legal arguments.
- Integrated REST APIs powering the chatbot and case-analysis features, working as part of a team to deliver case-specific assistance to advocates.

EkJJ – Membership & Education Platform | React.js, REST APIs

- Developed multi-step user flows, dynamic forms and reusable UI components for a membership-based education platform.

ACHIEVEMENTS

- Improved NayaaProperty page load time by about 30% through rendering and state-management optimization.
- Implemented the client-approved NayaaProperty design system and Developer Portal redesign.
- Completed 2,000+ hours of hands-on full stack development training.

EDUCATION

Full Stack Web Development Bootcamp (1 year, non-degree) | Masai School, Bengaluru, India | 2024 – 2025

- Built responsive e-commerce web applications with React.js, JavaScript and Tailwind CSS, including client-side routing and reusable component structure, working in Agile teams with Git, pull requests and peer code reviews.

Bachelor of Computer Applications (BCA) | Amity University, Noida, India | 2021 – 2024
